Continous Improvement Engineering

Not only do we optimize SAP software systems for maximum performance and uptime, but also approach the limits of what is possible to keep SAP architectures ahead of the curve. Our certified SAP experts bring diverse skills across QA/QC, automation/RPA, UI/UX, DevOps, Testing, and more to make sure your SAP applications don't just work but deliver differentiated value.

We keep a tab on evolving trends and technologies and scour through insights to push the envelope of SAP innovation and ensure:

- On-demand functionality improvements that are independent of release cycles.
- System changes that are deployed at a higher frequency and with better quality.
- Metric-driven feedback to fine-tune business service management.

David Devich
CIO, Momentive Technologies

“We chose a greenfield implementation despite significant risks, including a pandemic. We knew our team was strong but added support from Kellton, SAP and AWS gave us the confidence to proceed.”
