

Infinite Possibilities with Technology

Crafting intuitive digital products for elevated Customer Experiences

In today's fast-paced digital world, the demand for groundbreaking digital products is soaring, reshaping business dynamics. The immersive experiences that digital products provide, seamlessly connect touchpoints through data-driven strategies, elevating brand experiences that it delivers to the customer. We believe building digital applications requires partnership, so we work closely, infusing quality, value, and service into your distinct applications. We measure our success by your success.

Digital Product Development

End-to-end development

Design, development, support for robust digital products

Upgrades & legacy app integration

Continuous low-risk integration for up-to-date future focused apps

API development

Specialize in REST APIs, easy to consume, intelligent & reliable

Product Design

Product Roadmapping

Ensuring all stakeholders are aligned with the product vision & goals

UX research

User interviews, personas & journey mapping, usability testing & UX Audits

Product design

Exceptional wireframing, prototyping, & interactive, responsive design

Design systems

Consistent brand style, via reusable components and icon set design

Mobile Engineering

Native app development

Intuitive, high-performing mobile apps (iOS &, Android)

Hybrid app development

Expertise in web tech, developing mobile apps with same backend code

Cross-platform app development

Single codebase app development that works on multiple OS

Progressive web app development

Reliable & engaging web apps for high performance, speed, & accessibility

Our Esteemed Clientele

The Kellton advantage as a product development partner

Strong technical expertise

Our engineering team team is a squad of tech-savvy engineers wielding cutting-edge expertise in advanced tools and frameworks

User-centered design

Collaborating with our design team, we create intuitive, visually stunning interfaces, via UX/UI best practices to ensure user delight and loyalty

Agile & collaborative approach

We work hand-in-hand with stakeholders, clients, and team, ensuring a flexible, iterative approach that aligns with your vision and user expectations

Cross-platform expertise

We're cross-platform experts, making seamless apps on web browsers, mobile devices (iOS/Android), and desktops, saving time and expanding compatibility

Performance optimization

We optimize code, use caching, lazy loading, and network optimization to create lightning-fast, responsive apps for an alluring user experience

Integration and delivery

We breathe life into projects via continuous integration & delivery. Frequent testing, updates, and bug fixes create a captivating experience

Proactive problem-solving

We tackle issues head-on. Our engineers actively seek solutions, rigorously test, and eliminate bugs to ensure rock-solid, error-free apps

Project management

We maintain strong channels within our team, with stakeholders. We ensure clarity, timelines, and transparent progress reporting, fostering efficient collaboration

Kellton applies the most innovative and agile tech stack

Success Story

HUMBL

A California based fin-tech startup, focused on creating effortless experiences for payments, Non-Fungible Tokens(NFT), and ticketing. We empowered the client by elevating their web and mobile applications, providing a flawless experience to create an exceptionally adaptable and scalable platform. We increased the user onboarding on the platform by 70%, enabling interoperability and growth capitalization.

Regional Finance

Regional Finance is one of the leading consumer lending firms in the United States serving over 350,000 customers in thirteen states. We digitized the entire loan application and qualification process. The client achieved a significant increase in incoming leads and has reduced processing time and cost by enabling their employees to qualify for and approve loans online.
