

NextGen Services

Envisioning a NextGen

enabled business landscape

Leverage early-adopter benefits through our expertise in NextGen services

Through our comprehensive range of NextGen services and an innovation-led approach, we are helping some of the most forward-thinking companies leverage cutting-edge technologies. Whether it's developing a modern and powerful NFT marketplace, creating advanced Metaverse experiences, or delivering state-of-the-art Digital Signage solutions, our certified engineers, strategists, innovators, and developers have successfully empowered businesses worldwide.

Web3 & Blockchain

Elevate your business with our comprehensive Blockchain and Web3 solutions. From **NFT marketplace development to dApps and smart contract creation**, we specialize in harnessing Hyperledger technology for secure, transparent transactions.

Our expertise spans Token creation, Decentralized Exchanges (DEXs), Ethereum development, and more, ensuring successful deployment with robust audit trails and Data management processes.

Digital Signage Solutions

We deliver impactful Digital Signage solutions with commercial grade displays, interactive touchscreens, and robust security features providing engaging and personalized experiences, leading to higher audience engagement and satisfaction.

Our Cloud and IoT-based CMS enables **seamless, remote content management in real-time**, while AI can analyze audience behavior for better content optimization.

About us

At Kellton, we are a forward-thinking technology company dedicated to empowering businesses with agile, secure, and scalable web and mobile solutions. Leveraging our deep expertise in Web3 and Blockchain technologies, we craft innovative solutions that address the unique challenges of modern enterprises. Our passion for technology drives us to explore the infinite possibilities it holds, delivering market-ready, intelligent, secure, and scalable solutions that provide maximum value.

Transform your business with Kellton

From innovation and ideation to strategy, design, development, prototyping, and product launch, we simplify your transformation journey. Our comprehensive approach ensures that every step of your project is handled with precision and expertise.

The Kellton advantage as a NextGen Services partner

1

Deep domain expertise

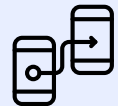

Our proficiency spans across various ERC protocols, ICO, IDO, DEX, Tokenomics, Governance, Marketplace, and more, allowing us to deliver specialized solutions tailored to your needs.

2

Prototype mastery

We excel in demonstrating diverse Blockchain use cases through impactful, tangible prototypes that illustrate the potential of innovative technologies.

3

Continuous training & labs

We foster world-class skills through ongoing training programs and hands-on labs, ensuring our team remains at the forefront of technological advancements.

4

Consensus, security, and risk mitigation

Our robust, integrated security measures and progressive risk management strategies ensure your projects are safeguarded against potential threats.

Our esteemed clientele

Success story

Humbl roped in Kellton as a strategy and technology partner to help it build, scale, and transform its mobile app and NFT marketplace. We drew on our deep Blockchain and NFT development expertise and enabled the organization to drive innovation and accelerate time-to-value. The client is now expanding into new markets, building new lines of revenue, and thriving with an agile and scalable NFT marketplace.

70% Increase in user onboarding on the platform

20+ Wallets supported by platform for scaled transactions
