

Data Science & Engineering Services

Knockdown Data silos. Reduce costs.
**Improve efficiency across
business processes.**

Unlocking the power of Data Engineering

We provide powerful and scalable Data Analytics services and solutions that help our clients improve visibility across departments, respond faster to customer needs, and effectively compete in today's digital economy. Our end-to-end offerings cover the entire gamut of Data Analytics.

Data Engineering

From **Data Warehousing** to **Custom Data Lake setups**, and cutting-edge Data Management services, we empower you to make informed decisions and drive business success.

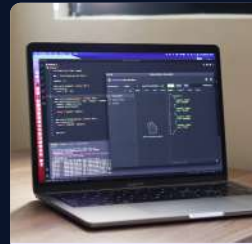

Data Science

With expertise in **Conversational AI**, **Architectural strategy**, **Computer Vision**, and more, we build realistic natural language processing models that ease the stress on your workforce, increasing efficiency.

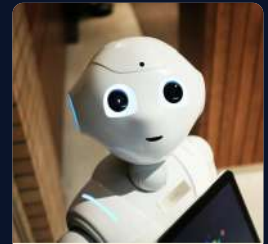

Visualization & Analytics

Leverage critical Data to maximize your KPI potential through our expertise in identifying patterns, enabling Data-driven decision-making through **Business Intelligence** and **BI platform integration**.

Integration & API

From **full-scale integrations of BPM and Enterprise Services** to smooth Data migration to B2B Cloud platforms, we ensure seamless transitions and enhanced operational efficiency.

Automation & RPA

Our expert team collaborates with you to implement **game-changing RPA solutions** and harness intelligent automation for precision, performance, and innovation in your operations.

About us

Kellton enables businesses across various industries to stay at the forefront of digital innovation with its deep domain expertise and powerful foundation of people, technologies, and methodologies. We work with startups to Fortune 500 companies and build technology stacks that deliver Data Modernization and Analytics solutions to generate valuable, actionable intelligence.

We proudly align ourselves with esteemed partners such as Cloudera, Kafka, webMethods, Snowflake, and other leading Data platforms and tools. Leveraging these partnerships, we tailor solutions that precisely meet our clients' needs, ensuring they harness the full potential of their Data.

The Kellton advantage as a Data Science & Engineering partner

Progressive approach

We use the latest AI and Machine Learning technologies and best practices to build Data solutions for long-term business success.

Strong portfolio

We've helped Fortune 500 companies, early-stage startups, and every type of company in between to maximize Data insights.

Customizable solutions

We build Data solutions to your exact specifications, with a completely customizable approach that follows your business needs.

Our esteemed clientele

Success story

A US-based Agriscience company delivering solutions to the world's most pressing agriculture challenges. We created and deployed an intuitive online dealer platform, Care Portal to expedite the resolution of complaints and offer dealers a central point of entry to access information.

Consolidated and streamlined operations across dealer divisions

Increased efficiency of digital systems and lower business costs

Client speak

“The great thing about working with Kellton is that they operate as a technical partner at all levels, looking at how we build our products and making sure we are using the most appropriate tech stack such as AWS Cloud.”

Philip Mayling
CEO, VenuelQ
