

Cloud Engineering Services

Unleash value faster with

**Kellton's end-to-end  
Cloud services**

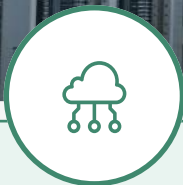

# Ready to accelerate the Cloud transition?

In the era of the "new normal," businesses are embracing a comprehensive digital shift driven by Cloud technology. To stand out from the competition, leaders must swiftly navigate this transition. Our innovative approach empowers enterprises to accelerate their journey to the Cloud, ensuring a seamless transition with automated operations and a scalable platform.

## Make the leap to the Cloud with Kellton

Cloud adoption journey is complex, costly, and carries substantial risk. We support enterprises at every step of the adoption process by leveraging our full spectrum of capabilities, partnerships, tools, and technologies—and helping them transition to the Cloud at their pace.

### Cloud Consulting

We assist in evaluating your infrastructure, selecting Cloud service providers, and recommending migration services. Our offerings include landscape assessments, aligning objectives, & **developing actionable plans to meet business goals.**

### Cloud Migration

From architecture design to application migration, we ensure **seamless Cloud Migration** tailored to your needs while prioritizing security and minimizing downtime, ensuring a smooth transition to the Cloud.

### Cloud Managed Services

Our Cloud Ops team minimizes downtime & ensures compliance. Our **Hybrid & Multi-Cloud Management** solutions optimize operations across diverse Cloud environments, maximizing efficiency, security, and performance capabilities.

### DevSecOps

We fortify your architecture with DevSecOps solutions, optimizing deployment **automation, CI/CD, Infrastructure as Code, and security testing.** Our tech-agnostic approach ensures robust software, aligning seamlessly with agile development for max security & efficiency.

## About us

Kellton enables businesses across various industries to stay at the forefront of digital innovation and collaboration with its deep domain expertise, cross-industry experience, and powerful foundation of people, technologies, and methodologies. We work with Start-ups to Fortune 500 companies helping them build a high-level strategy and implementing the right type of Cloud - Private Cloud, Public Cloud, Hybrid Cloud, or Multi-Cloud as needed.
